ADDITIONAL SHEET

CCR #: Rev: Originator: Rajesh Dharia

Telephone: X0498 Office: Rel Devlopment

Title of Change:

The Goals

- 1. Convert OPS, SMC5B, and FRT modes in string 1 to Irix6.5
- 2. Keep DEV04 at Irix6.2 (will be the single Irix6.2 mode)
- 3. Add a new Irix6.5 mode called DEV03 (for sockets pre-integration)
- 4. Move custom code off science procs ready for Irix6.5.9m upgrade

The Plan

- 1. Add Hopi to the lab and upgrade to Irix6.5.6m to act as a science proc
- 2. Upgrade Origin to Irix6.5.6m to act as a science proc (later upgrade Hopi and Origin to Irix 6.5.9m)
- 2. Fix Kidnaped's RAID (it's currently offline) and rebuild the machine, upgrading to Irix6.5.6m
- 3. Upgrade Juror2 and Kickapoo to Irix6.5.6m

The Progress

- 1. Origin has been upgraded (thanks to Kevin "Sleepless in Landover" Lange).
- 2. The Juror2 and Kickapoo upgrades can't be done until the lab can permit the downtime. This will be earliest Oct 7th.
- 3. We plan to complete all work except the Juror2 and Kickapoo upgrades prior to next Friday, Oct 6th.
